Hello Liz, our response to your query dated 19 Feb. is below. Please attribute the statement to Mr. Derek Robinson. R, Bill

====Navy Response====

"The clean-up program at Hunters Point is guided by remedial goals that were set with an open, public comment process and are finalized in the Record of Decision (ROD) for each parcel. For radiological constituents, an example of Navy's remedial goals, taken from the Parcel E ROD, is included in the attached.

Consistent with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) process, the Navy will evaluate data collected during re-testing efforts against applicable, updated safety standards and requirements to ensure that the site remains safe. As part of the typical Five Year Review process, the protectiveness evaluation, including calculations, will be included in reports after fieldwork is complete. The Five Year Review process evaluates protectiveness for all remedial actions every five years."

Subject: [Non-DoD Source] Navy PRG Calculations for Hunters Point Cleanup

Hi Bill,

Can you please send me the PRG calculations the Navy is using for the Hunters Point cleanup? There seems to be some confusion. Does the Navy plan to make those calculations public? If not, why not?

Appreciate your help.

Liz Wagner
